

EDUCATION

Bowie State University

Bowie, MD

Bachelor of Science in Computer Science, 6x Dean's List

GPA: 4.0 | May 2026

Courses: Data Structures & Algorithms, Calculus I, Probability & Statistics, Programming Languages.

Leadership: Vice President Bulldog Coders, Recruiter Women In Computer Science

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, JavaScript, HTML, CSS.

Frameworks/Libraries: Tensorflow, ScikitLearn, Pandas, Numpy, Matplotlib, HuggingFace, LangChain.

Technologies: OpenAI API, Large Language Models (LLM), Natural Language Processing (NLP), Generative AI.

Certificates: AWS Machine Learning, AWS Developer, AWS Solutions Architect. AWS Cloud Practitioner.

WORK EXPERIENCE

Apple - Incoming Data & Artificial Intelligence(AI) Intern

May 2025 - Aug 2025

Apple - Artificial Intelligence Machine Learning(AI ML) Intern

May 2024 - Aug 2024

- Engineered a Python-based **LLM-Assisted App Crawler** using advanced prompt engineering, increasing app interface navigation speed and reducing authentication bypass time.
- Optimized app crawling algorithms, resulting in a **25% increase in unique screen** discovery and **8x improvement in app coverage**, enhancing data collection capabilities.
- Architected a **graph-based system** to model app structure, facilitating the creation of a comprehensive **dataset** that increased data quality by **10%** and expanded analysis capabilities by enabling **5** new types of insights.
- Implemented **Git** version control for AI-driven app exploration and **data analysis** workflows, reducing code conflicts and improving team collaboration efficiency.
- Streamlined AI experimentation processes, reducing cycle time and enhancing development efficiency and team collaboration through detailed documentation.

Runwei - Artificial Intelligence Machine Learning(AI ML) Intern

Jan 2025 - May 2025

- Optimized AI-powered **recommendation** engine using **Azure Machine Learning** and advanced NLP, improving profile matching accuracy by **80%** and reduced manual user input by **18%**.
- Enhanced matching algorithms, increasing accuracy by **30%** and driving a **20%** rise in successful funding connections through improved AI-powered recommendations.
- Integrated **LLM-powered** support features, providing real-time, culturally sensitive assistance that improved user satisfaction scores by **35%**.
- Designed and implemented an AI-driven personalized learning prototype, increasing user engagement by **35%** and improving skill assessment accuracy by **50%**, leading to a **25%** higher completion rate for training modules

CyDeploy - Machine Learning Engineer Intern

May 2023 - Aug 2023

- Optimized **AI pipeline** efficiency by 40% through strategic integration of cutting-edge Machine Learning libraries (Hugging Face, OpenAI API), reducing processing time from **4 to 1.5 hours**.
- Automated **RPA** script outcome labeling using GPT-4 and OpenLLaMA, improving efficiency by **10%** and increasing labeling speed by **5** times, enhancing overall process scalability.

PROJECTS

- RAG CHATBOT** : Developed a **Retrieval-Augmented Generation (RAG)** chatbot using **LangChain** and **Llama3**, achieving **95% semantic search accuracy** and **3x faster response times** via optimized **ChromaDB vector storage**.
- ARGUS** : Engineered a **supervised learning model** for crash detection, reaching **85% accuracy** across **car, train, and motorbike accidents** using a **balanced dataset (100 samples per category)**, securing **3rd place in a university challenge**.
- GOSPEL BREAKDOWN** : Engineered an AI-driven web application using **OpenAI's GPT-3**, integrating a dual-text feature that provides personalized prayers and sermons, resulting in **50%** increased user engagement and processing of **20+ daily requests** for faith-based content.
